

CALL FOR PAPERS

Advances in Animal Production, Food and Health: From Tradition to Innovation

October 26th and 27th, 2024

Institute of Veterinary Sciences El Khroub

Honorary President: Pr. Ahmed BOURAS
President of the Seminar: Pr. El-Hacene BERERHI
GSPA Laboratory Director: Pr. Sabrina BOUSSENA

Preamble

Food security and nutrition are critical global challenges, directly tied to the Sustainable Development Goals (SDGs), which aim to eliminate all forms of malnutrition worldwide by 2030. Over the centuries, the relationship between humans and animals has profoundly shaped our cultures, economies, and societies. The interconnectedness of animals, food, and health remains a vital issue in our rapidly evolving world.

Looking ahead, it is essential to carefully consider the scientific, technological, and conceptual advancements reshaping our perspectives on animal production, food, and health. This seminar, aims to explore current progress in these interconnected areas, highlighting the transition from traditional practices to innovative and sustainable solutions. We seek to bring together experts from diverse fields from researchers to practitioners, including actors from the socio-economic sector to discuss emerging trends, current challenges, and future opportunities across the entire food system and animal production, from farm-to-fork.

We are confident that this gathering will foster a productive exchange of ideas, knowledge, and experiences. By working proactively, we can shape a future where animal production is sustainable, food is nutritious, and health is a priority for all.
